FIRST ANNUAL REPORT

OF THE

BUREAU OF VITAL STATISTICS

OF THE

NORTH CAROLINA
STATE BOARD OF HEALTH

1914

RALEIGH
EDWARDS & BROUGHTON PRINTING COMPANY
STATE PRINTERS AND BINDERS
1915

RALEIGH, N. C., January 1, 1915.

DR. W. S. RANKIN,
State Registrar Vital Statistics,
Raleigh, North Carolina.

DEAR SIR:—I have the honor to submit the First Tabulated Report of deaths occurring in North Carolina under the Vital Statistics Law for 1914; also a table showing total number of births, marriages and deaths with the rate per 1,000 population, together with an outline of the work accomplished by this Bureau.

Respectfully submitted,

J. R. GORDON,
Deputy State Registrar.

RALEIGH, N. C., January 1, 1915.

DR. J. R. GORDON,
Deputy State Registrar,
Raleigh, N. C.

DEAR DOCTOR:—In accordance with your request, permit me to submit herewith a condensed statement of the work done in this Department for the year 1914, together with tabulated tables for counties and towns of 1,000 and over in population which were not completed in time to be included in the Biennial Report.

The increase in the number of certificates received is most gratifying. So marked was this advance that on receipt of transcripts for the towns in the registration area to August 31st, the Bureau of the Census commented on it and the shape in which the work was gotten up.

From the attached statement it will be seen that without the earnest co-operation of our office force the getting out of this volume of work would have been impossible. They have labored hard and I wish them to have due credit for their interest in the work.

Yours very truly,

T. PEYTON BROWN,
Chief Clerk.

NOTE.—In the above table Indians and unknown race are counted as colored.

*Year 1914 statistics not yet available. †Per 100,000 population. ‡Not given by races. §High tuberculosis death rate due largely to non-residents. ¶Including State institutions.

ERRATA

The estimated population used in computing death rates in Table X was made up in this office, and will be found to vary slightly with the estimated population sent out by the Bureau of the Census.

The death rate for Winston-Salem was based on the estimated population of Winston alone, when it should have included Salem. The corrected death rate is based on the estimated population sent us by the the Bureau of the Census for Winston-Salem, as is the death rate for Rocky Mount.

Town	Total Deaths	Death Rate Per 1000	Deaths by Races	Death Rates per 1000 by Races	Typhoid Fever		Measles	
					No. of Deaths	†Death Rate	No. of Deaths	†Death Rate
Rocky Mount.....	202	18.6	{ W 84 C 118	12.5 28.5	1 7	14.8 169.1	1	14.8
Winston-Salem.....	639	22.0	{ W 284 C 355	16.3 30.5	6 10	34.4 86.1	-----	-----

The correct death rate in the city of Asheville computed by the last estimated population for the city is: Tuberculosis (all forms), whites, 701.5; colored, 381.9. High Point, typhoid fever, colored, 76.9; tuberculosis, colored, 230.7.

†Per 100,000 population.
